

furse Solid Copper Earth Plate

Ref	Size (mm)
PE010	600 x 600 x 3
PE020	900 x 900 x 3

furse Lattice Copper Earth Mat

Ref	Size (mm)
PE110	600 x 600 x 3
PE120	900 x 900 x 3

furse Earth Inspection Pits

Concrete Pit

Ref	Weight (kg)
PT005	30
PT050	19
Accessories	
PT006	5 Hole Earth Bar
PT007	7 Hole Earth Bar

Plastic Pit

Ref	Weight (kg)
PT205	1.8
Accessories	
PT004	5 Hole Earth Bar

Conducrete

Conducrete is a conductive concrete, which significantly enhances the performance, and extends the life of earthing systems. It provides superior protection from fault current, protects earthing systems from theft and corrosion, as well as being the fastest product to install of its type in many applications.

Ref	Bag Weight (kg)
DM100 (Powder form)	25

furse Soil Conditioning Agent

Marconite conductive aggregate added to concrete in place of sand helps produce a reliable earth resistance. COSHH sheet available.

Ref	Bag Weight (kg)
CM025	25

furse Bentonite

Used as a backfill surrounding the earth rod helps with water retention and thus maintain a low soil resistance. COSHH sheet available.

Ref	Bag Weight (kg)
CM015 (Powder)	25
CM015-PM (Granules)	25
