

Power Distribution Enclosures

Pillar shells and in-ground
feeder pillars

Lucy Zodion – Power distribution enclosures for every market

Lucy Zodion is the UK's leading provider of feeder pillars with a wide range of high quality products, in many sizes and materials. We hold a large UK-based stock enabling us to support your projects quickly and easily and our distributor network covers the whole of the UK, so wherever your project – you can count on us!

Manufactured to the highest standard, whether your enclosure is made from Cast Iron, Stainless Steel, Glass Resin Plastic (GRP) or Hot Dip Galvanised (HDG), Lucy Zodion can provide a robust and durable service, fast!

All our standard sized products are available in a number of materials and finishes, with optional extras that can help create a solution that better matches your requirements. As well as our standard range of stocked sizes we specialise in manufacturing bespoke solutions in all sizes. Our UK-based design and engineering team can help whatever your requirements, ranging from EV charging enclosures, to PADs approved GRP enclosures.

All of our enclosures are available painted, so whether it's a specialist finish such as G2A for highways, or a RAL colour to meet a design specification for an airport or urban scheme, our painted products offer a top quality finish and with a standard lead time of 2 – 3 weeks.

Why choose Lucy Zodion?

Our market leading position is founded on high build quality and excellent availability. We have many years' experience in delivering a wide range of market leading products, across many sectors, including;

- Street Lighting
- EV Charging
- Rail
- Urban Regeneration
- Highways
- Airports
- Retail & Leisure
- Utilities

All of our products are manufactured in accordance with the relevant BS EN Standards.

Distributor Network

Our enclosures are available from our wide reaching distributor network that will be able to service your needs across the whole of the UK. Our products are widely available through all of the following;

- Leading national electrical wholesalers
- Independent electrical buying groups
- Industry sector specialist distributors

For more information on our distributor network please contact our sales team on +44 (0)1422 317317 or email sales@lucyzodion.com

Attractive Lead Times

- Standard pillars: Lead time 2 – 3 days (Overnight on request)
- Standard painted products: Lead time 2 – 3 weeks
- Bespoke items: Price and delivery on application
- Cast Iron: Lead time up to 8 weeks

All lead times are dependent on stock availability at time of order

Value Added Services

In addition to standard enclosures Lucy Zodion provides a wide range of value added services:

- Pre-wiring and testing
- Design services
- Bespoke and specialist products
- Painted solutions
- Maintenance packages
- Special locks and heaters

For all pre-wiring and value added services please contact our specialist pre-wire team on +44 (0)1422 317335, or email pwpsales@lucyzodion.com

Pillar Shells

Lucy Zodion's Fortress range of Hot Dip Galvanized (HDG) pillar shells are the UK's leading range of enclosures for external power distribution applications. Sold widely across the street lighting and highways sector, the Fortress pillar shell range provides high quality at an affordable price.

With a number of features, such as detachable roofs and roots, aiding various installation requirements, Lucy Zodion's range of "Lucy Pillar" shells doesn't stop at the standard Fortress range. Our dedicated Design Centre can also work with you should a bespoke requirement arise, whether it's a streamline solution to meet space restrictions or a large double door shell to host more complex electrical specifications, we can help.

Standard Construction

- 3mm or 5mm* thick mild steel galvanised to BS EN ISO 1461
- Galvanised and painted variations available for extra durability
- Available with detachable roofs and root sections*
- 18mm exterior grade plywood backboard
- Vandal resistant hinges flush to pillar and door.
- IP65 Door Seal rating (slimline, single and double door)
- Fitted with locks as standard
 - Single Door – Tri-head Lock
 - Double Door – Wedge Lock

Additional information

- BS or RAL paint colours supplied as per customer specification
- G2A paint finishes available for highways applications
- Stainless steel construction available upon request (BS EN 10088-1)
- Pre-wired services available upon request (tested to BS 7671)
- External sockets can be fitted upon request
- Cat-flaps and cable management option available
- Wide selection of lock options available upon request

* Single and double door pillars only

Heritage power distribution enclosures

The “Lucy Pillar” is renowned for its robustness whilst being able to provide a heritage design style that is pleasing to the eye. Whether you are looking to maintain architectural style in-keeping with its environment or need a product that will offer incredibly long service life, the “Lucy Pillar” is the one for you.

The Heritage cast iron range is manufactured at Lucy Group’s foundry in Oxfordshire, UK, and hand built by the Lucy Zodium team in Sowerby Bridge. Enclosures are built in accordance with BS1452, grade 180 (cap and sides) and are available in a range of sizes and colour options. Pre-wired service and build options are also available.

In-ground Power Distribution - Power from ground to socket in seconds

The Westminster range of In-ground power distribution units offer easily accessible power outlets without cluttering the street, making them ideal for markets, retail and event spaces.

Available in two frame sizes with 2 to 5 power outlet configurations the units rise into position in seconds providing safe and secure power. When not in use the unit retracts fully into the ground, out of sight.

A range of standard sized units are held in stock for fast despatch, whilst special designs such as integrated data, utilities and metering kits are available on request.

▲ Hampton, Peterborough

Construction	Options
<ul style="list-style-type: none"> • 2 to 5 power outlets (Single Pole) • Galvanised steel body (BSEN ISO 1461) • Lift assist on lid and tower • Long-life stainless steel wedge lock and hinges • A hinged stainless steel lock cover • IP67 electrical socket box (in accordance to IEC60529) • Positive drainage spigots (100mm) • Tower latching for safe operation • 40mm lid recess for pavements 	<ul style="list-style-type: none"> • Available in a number of power and outlet configurations • 16A, 32A and 63A RCBO protected outlets • Single and three-phase options available • Data, water and air options also available • Metering kits • Catflap option for managing trailing leads when in 'Down' position

30P	304 grade painted finish	Single, double, slimline
30L	304 grade grit finish	Single, double, slimline
3CP	3CR12 painted finish	Single, double, slimline
316	316 grade stainless steel	Single, double, slimline
31P	316 grade painted finish	Single, double, slimline
31S	316 grade polished finish	Single, double, slimline
31L	316 grade grit finish	Single, double, slimline

Code	Options	Pillar
A	Internal Gland Plate	Single and double door
AH	Green Colour	Heritage only
B	Infill panel for root section	Single and double door
C	Bar lock	Heritage only
D	Yale Lock	Single, double, slimline, Heritage
E	Hasp and Staple	Single, double, slimline
F	Alternative paint colour	Heritage only
G	Heater kit	Single, double, slimline, Heritage
H	13 Amp socket kit	Single, double, slimline, Heritage
I	Lighting kit	Single, double, slimline, Heritage
J	Document pocket inside door	Single, double, slimline
SS	Stainless Steel	Fortress range
S	If "S" Special requirement is selected, a full description with diagrams and specification must be provided	Single, double, slimline, Heritage
SL	Special Locks – state lock type required	Fortress and Heritage range

Did you know we can power EV charge points, too?

As the demand for EV increases, there becomes a growing need for the implementation of accessible charge points, meaning a step-change in urban infrastructure is required, therefore the demand for power distribution solutions are on the up.

With this in mind, Lucy Zodion is able to meet a number of EV power distribution requirements to meet almost all specifications, configurations and styles. We have an in-house Design Centre dedicated to the design and manufacture of bespoke power distribution pillars and have extended our service to EV power distribution enclosures, developing solutions to meet growing demand.

The benefits of our service include:

- Case-for-case approach to EV power distribution projects to ensure we meet your specification objectives
- In-house Design Centre to ensure approved drawings are closely followed and tested once designed
- IET and BS industry standards followed to ensure product suitability and conformity at application
